OVER 100 EMBRYOS AVAILABLE OUT OF OUR MOST ELITE COWS - THE BEST OF THE BEST

These genetics will jump start any program, whether you've been in the business for decades or just getting started. Only the most elite females, each one having produced at least 6 consecutive calves starting as a two-year-old, with proven track records, have made it into our Donor Program. Simply put, these cows have never missed a beat. A 1998 model, **8237**, our youngest Donor, is the dam of the much acclaimed Herd Sire Lasater 0192. Her embryos are bred by Lasater 5096. **6230**, an elite 1996 model, has had a phenomenal record. Her first calf weaned at 712 lbs compared to a 611 lbs average, and her 2004 calf weaned at 771 lbs, which was 177 lbs over the bull calf average. We kept him as a Herd Sire. 6230's embryos are bred by Lasater 0192. **7613** is not only physically flawless; her calves are built rock solid just like she is and with loads of performance. Her embryos are bred by Lasater 5096. **7019** is another physically impressive donor with an excellent record. Her 2001 bull calf was kept as a Herd Sire. Her embryos are bred by Lasater 0192. **Contact Andy or Dale for a complete list of embryos and prices.**

Lasater Beefmaster 0192

This great sire caught our attention early in his career and keeps on impressing us year after year. You can't imagine a more massive, powerful, heavily muscled, attractive bull than Lasater Beefmaster 0192. As a yearling, he was the most prolific breeder among the 2000 models. Five of his sons have been selected as Lasater Herd Sires. His dam, 8237, has been the ideal Foundation Herd cow, producing fantastic sons and daughters, including a top bull who sold in our 2003 sale. **Sons sell in this year's sale and semen is available at The Lasater Ranch.**
